## FEBRUARY 2009 - TRAINING CALENDAR

Tested	CATEGORY	SHOW TITLE	SHOW #	LENGTH	SYNOPSIS
A+	American Heat	Wildfires	463-0506	30 minute video plus course materials	This course is intended to acquaint students with the basics of wildland firefighting. For some, it will simply be an important review of things they already know. For others, it may be the first time that they have ever been introduced to these important safety tips that have the potential to save the life of a firefighter.
A+	PULSE	Pediatric RAD/Asthma	464-0207	30 minute video plus course materials	The prevalence of asthma and associated morbidity has been on the rise for the past 20-30 years. Children are affected disproportionately, and up to 12 percent of children in the United States are affected. This course discusses emergency treatment approaches and differential diagnosis of pediatric asthma.
A+	Firefighter Training	Adapt and Overcome- Tampa Style	054-0079	60 minute video plus course materials	Sometimes, the most obvious solution to a fireground problem is not the best. Other problems have no obvious solution because responders on scene have never been faced with that particular situation before. So, what do you do? This edition of American Heat is brought to you by the firefighters of Tampa Fire and Rescue. When a small plane crashed into the side of a downtown Tampa skyscraper, though of 9/11 were just the beginning of the many uncertainties responders would face. When a fuel tanker overturned under a freeway overpass, Tampa firefighters were presented with much more than just a diesel fire. Both incidents tell interesting stories of improvisation on the fireground. Above all, this course discusses what strategic goals every fireground officer must remember and what tactics you may have never considered. Applicable standards: <b>NFPA 1001: 4-4.1, 4-4.2, 4-3.1, 4-5.1</b>
A+	Firefighter Training	Swiftwater Safety & Rescue- A Matter of Survival	038-0607	30 minute video plus course materials	An average of 200 Americans drown each year in flash flooding. It is the top weather-related killer, ahead of earthquakes, tornadoes and hurricanes. This course includes basic safety and survival skills to be implemented in and around the moving water environment. It also covers basic rescue skills, including self-rescue skills, shore-based rescues, management of aquatic spinal injuries rescue from low-head dams, and boat based rescues.
A+	Firefighter Training	Firefighting Tactics at Vehicle Fires, Part 1	038-0035	30 minute video plus course materials	There are millions of vehicles on the roads today, and some will ignite. Vehicle fires pose unique dangers to firefighters, not only from the burning car but also from the traffic passing the scene. In the first of our two-part series, we take a look at the proper PPE, how to size-up a vehicle fire, and the characteristics that pose dangers for firefighters. Join us in Cincinnati, Ohio, as Doug Cline and Mike Finney demonstrate proper ways to extinguish vehicle fires.
A+	American Heat	Emergency Management of Mass Gatherings	500-0183	60 minute video plus course materials	Mass crowds can equal mass incident. Your best defense is to hope for the best, plan for the worst. It's an easy statement to make, but a difficult task to accomplish. This course reviews three separate incidences where firefighters have experience with a major mass gathering event on an international level. We also take a look at some mass gatherings gone wrong. Plus, we've got some mass gathering "street smarts" that may help you in future mass gathering situations.
A+	PULSE	Care Across Cultures	464-0206	30 minute video plus course materials	The face of our nation has changed dramatically. And in the next 50 years, all major minority groups are estimated to increase in population. To meet the demands of such a diverse culture, first responders must work well with patients and co-workers from different backgrounds. This course increases staff sensitivity to cultural differences and offers guidelines for working within a diverse environment.

<b>Tested</b>	<b>CATEGORY</b>	<b>SHOW TITLE</b>	<b>SHOW #</b>	<b>LENGTH</b>	<b>SYNOPSIS</b>
<b>A+</b>	<b>American Heat</b>	<b>Legacy Wisdom: Tricks of the Trade</b>	<b>463-0906</b>	30 minute video plus course materials	Professional development is a concept that is foreign to many firefighters, but it is a critical skill to learn if you want to move up in a fire organization. Join this edition of American Heat as we discuss how to "career map" your way to the top.
<b>A+</b>	<b>Firefighter Training</b>	<b>Forcible Entry, Part 1; Introduction</b>	<b>038-3001</b>	30 minute video plus course materials	Forcible entry is a skill that many firefighters lose proficiency in due to limited opportunities to review and practice. This course reviews the basic theory involving forcible entry tools as well as window, door, and lock construction. Part 1 of this forcible entry series is a solid review of the targets and equipment required to safely and effectively carry out forcible entry operations on the fireground.
<b>A+</b>	<b>Firefighter Training</b>	<b>Forcible Entry, Part 2: Hand Tools</b>	<b>038-3002</b>	30 minute video plus course materials	Part 2 of our forcible entry series covers basic forcible entry. You will learn and review the basic operations required for the majority of access problems in the field. Watch as Kentucky firefighters "tear it up with class" for your benefit.
<b>A+</b>	<b>American Heat</b>	<b>Firefighter Safety on the Roadway</b>	<b>463-0705</b>	60 minute video plus course materials	In this course, Chief Ron Coleman discusses the various ways that people learn their jobs. This course explains differences between formal and informal ways of acquiring knowledge and the importance of having to revisit the past and compare the two situations so that you can be prepared should a tanker explode in your area.
<b>A+</b>	<b>American Heat</b>	<b>Heat, Heart, &amp; Health</b>	<b>463-0902</b>	60 minute video plus course materials	Your job is to take care of others, but are you also taking care of yourself? Firefighters are ordinary people doing an extraordinary job, and its up to you to meet the demands of your profession. In this edition of American Heat, we visit Las Vegas and Phoenix to find out how members from these two departments keep their well-being in check, especially during the summer months. You will also hear the story of a Phoenix firefighter who momentarily became a heart attack statistic but is not getting a second chance at life. From on-scene rehab to preventing heart problems, you will see how focusing on wellness can save lives...the lives of your own.
