

FEBRUARY 2010 - TRAINING CALENDAR

Tested	CATEGORY	SHOW TITLE	SHOW #	LENGTH	SYNOPSIS
A+	PULSE	NEW Poisons and Toxins	464-0210	30 minute video plus course materials	Tylenol. Bleach. Alcohol. The things you use on a regular basis can quickly become more hazardous than helpful. It is important for pre-hospital care providers to know what is toxic, where those toxins come from, and how to respond to them. This course provides resources for determining the toxicity of a substance, and it analyzes the various routes of poison exposure. Unintentional poisoning, natural toxins, overdose, and alcohol abuse are discussed, and patient management, treatment, and transport options are reviewed.
A+	Firefighter Training	NEW Prevention of Sexual Harassment	038-0210	30 minute video plus course materials	Firefighting is tough enough without having to put out the fires of sexual harassment within your own department. A single sexual harassment case can cost your department hundreds of thousands of dollars – not to mention the poor publicity. Learn from an attorney and a battalion chief how you can keep this from happening in your department – in “Prevention of Sexual Harassment” on FETN
A+	Firefighter Training	Survival! Basic Structural Tactical Initiatives	047-0180	30 minute video plus course materials	The basic structural tactical initiative (BSTI) plan assists with fireground organization and tasking. Join us as we learn from past incidents to make all of us safer firefighters. Learn to eliminate confusion, control your speed, initiate deployment, improve coordination and accountability, complement Incident Command, keep radio communications to a minimum, and most importantly, improve safety for firefighters.
A+	Firefighter Training	The Hazards of Fighting Trash Container Fires, Part 2: Initial Operations at Trash Container Fires	038-0032	30 minute video plus course materials	Part one of this series focused on stationary or static trash containers. This course focuses on compactors, other mobile types of trash bins such as garbage trucks, and other types of waste-removal vehicles. Compactors and garbage trucks can be a significant danger to firefighters. Not only are they faced with the hazards of the material wastes, they must confront the dangers of machinery, moving parts, or entrapment. This course discusses the specific dangers involved in mitigating these fires
A+	PULSE	Safe Kids: Prevention of Unintentional Injury	464-0808	30 minute video plus course materials	Safe Kids Worldwide is a global network of organizations whose mission is to prevent accidental childhood injury, a leading killer of children 14 and under. While there is no one device or solution that will effectively prevent all types of accidental childhood injuries, emergency medical technicians will realize the benefits of Safe Kids coalitions, which combine several factors to create programs that reduce injuries by educating adults and children, creating safe environments, conducting research, and advocating for effective laws.
A+	Firefighter Training	Metropolitan Profile—Philadelphia Fire Department	463-0303	60 minute video plus course materials	Philadelphia is home to the fifth-largest fire department in the United States, and possible one of the oldest. The Philadelphia Fire Department (PFD) has been serving Philadelphia for nearly 265 years. In this special edition of American Heat, we take you inside the PFD for a metropolitan profile. From day-to-day operations to the details of a recent 6-alarm, you will see how this department takes care of business as well as its firefighters.
A+	Firefighter Training	Industrial Fires in Suburbia	463-0406	30 minute video plus course materials	Firefighters are often aggressive by nature and tend to operate in the offensive mode. There are times, however, when it is more appropriate to adopt a defensive or non-intervention strategy. This course describes and shows how to apply the incident problem-solving model to a hazardous materials incident. It identifies the components of an incident action plan and explains the strategies of isolation and non-intervention. Local, state, and federal resources that may assist the local fire department in the event of a hazardous materials event are also outlined.

A+	Firefighter Training	Self-Assessment	038-7003	30 minute video plus course materials	The purpose of this course is to promote the concept of self-assessment to determine whether a fire department is taking all of the appropriate steps to prevent line-of-duty deaths. Inherent and environmental risk factors for firefighters, increasing work environment safety, and self-assessment are all discussed.
A+	Firefighter Training	Dignity Despite Disaster, Part 1: Responding to a Line of Duty Death	038-0015	30 minute video plus course materials	A line-of-duty death (LODD) is one of the toughest situations to deal with. If you are not prepared with a pre-plan, it will be an even more difficult task to undergo. Join Dan McGuire, senior instructor for CISM Perspectives, as he shows how to provide an honorable remembrance of the fallen firefighter. He also outlines the “taboos” of LODD and shows you how to compose or update a written LODD pre-plan.
A+	Firefighter Training	Media Savvy, Part 1	038-0086	30 minute video plus course materials	At worst, fire service and law enforcement agencies experience a hate-hate relationship with the news media that can hamper firefighting and crime-fighting efforts, as well as keep the public from knowing information it needs and/or has a right to know. At best, healthy relationships between media and police and fire departments can result in accurate news coverage and positive public sentiment. This course explains what reporters are looking for and how you can provide information without revealing anything confidential.
A+	Firefighter Training	Winter Firefighting Operations	054-0060	60 minute video plus course materials	How do you prepare for winter firefighting operations? We went to the locations where these kinds of conditions are endured—and even taken for granted. Join American Heat as we travel to Toronto and Clarington, Ontario, and to International Falls, Minnesota, and learn why it is not a good idea to wash your fire truck in the middle of January. See how a coating of ice can actually keep you warm and how International Falls uses pumper engines as snowplows, and tour Toronto’s ice-breaking fireboat.
