

CORE

HOMELAND SECURITY & COUNTER TERRORISM

Awareness Level Training Course IX: Detecting Weapons of Mass Destruction, Part 2

947-1009

Part 2 of this two-part series examines the physical characteristics and properties of commonly used WMD materials and agents. Responders will also see common delivery mediums associated with these materials and learn the trends that might indicate a WMD event has taken place.

Emergency Preparedness & WMD Intercepting Nuclear Materials Shipments

176-2158

Every day, dangerous materials are transported over our nation's highways. Nuclear materials of all types have special transportation protocols. Knowing how to stop one of these vehicles and what to expect may save your life.

Mass Transit: A Target for Terrorism

888-0223

Statistics indicate that the vast majority of terrorist attacks worldwide continue to be perpetrated with conventional weapons such as bombs, firearms and limited-range rockets. The terror-causing potential of any of these weapons when used against a mass transit system is enormous. How do we stop this example of tomorrow's terrorist threat?

SUPPORT

Tire Tread and Tire Track Evidence

160-0012

Tire tread evidence is among the most-often ignored evidence at crime scenes. This usually stems from lack of proper training in the recognition and preservation of this type of evidence. Renowned impression expert William Bodziak lends his knowledge and expertise to present the proper way to photograph and cast footwear and tire impression evidence in this LETN training module.

Digital Crime/Infrastructure Protection Hackers, Part 2

152-0009

This program builds on the history of hacking to help construct a profiling of hackers that differentiates legal hacking, illegal hacking and unembellished computer crime. These categories help investigators predict, investigate and understand the criminal actions of suspects without wasting time and resources on the legal actions of hackers.

Tactical Patrol: Vehicle Search, Part 1

163-0006

The first lesson in our two-part series on vehicle searches focuses on three types of vehicle searches: frisk, search incident to arrest, and consent. For each type of search discussed, the legal requirements of the search as well as the permissible scope of the search will be discussed. In Part 2, other types of vehicle searches are discussed, including plain view seizures, motor vehicle inventory searches, and motor vehicle searches based on probable cause.

Calibre Press Presents: Roll Call Safety on Traffic Stops

057-4001

Welcome to the new face of *Roll Call!* Starting in January 2004, Calibre Press will be working with LETN to bring you real incidents and points of training that you can use. We begin with "Safety on Traffic Stops." We all know there is no such thing as a "routine" traffic stop. See live footage and hear from an officer who knows this firsthand!

LETN CLASSICS

Reporting Accurate Crash Investigation Data

176-2163

Injuries resulting from motor vehicle crashes continue to be a major public health problem. These injuries cause unnecessary financial burden through increased taxes and insurance premiums. Join us as we learn that linking crash and vehicle data can identify prevention factors, help in developing traffic safety programs, assist in redesigning roadways, and aid in the deployment of police personnel.

Tactical Jaw & Limb Control, Part 2: Pause Reflex

186-0092

Phil Messina returns with the second part of his presentation on Tactical Jaw and Limb Control. He explains and demonstrates the "Pause Reflex" and shows how it can give you that critical second or two necessary to end a confrontation.

Medical Detectives: Slippery Motives

184-0129

While her husband was out jogging, did Julie Thigpen Post really fall in the hotel bathtub, yanking a metal towel ring out of the bathroom wall, and drown? In this program a skeptical homicide lieutenant, an industrial testing laboratory, and a medical examiner known as "Dr. Death" proved that the incident was really staged by her husband, Ed, who then took a fall of his own—for first-degree murder.

Violent Offenders Analysis, Part 1

179-0118

FBI SSA Alan Brantley gives us an overview of the National Center for the Analysis of Violent Crime and introduces a three-pronged approach to understanding violent criminal behavior.

SPECIAL PROGRAMMING

Going for the Green: The Secrets of Grant Success, Part 1

056-2005

Knowing how to design and develop a potential grant proposal is essential to achieving grant success. This two-part series demonstrates the correct procedure when formatting grant proposals and applications, and shows you how to locate potential grant making organizations. *A printed informational packet accompanies this program but it is not tested.*

KEY TO SYMBOLS

Use the key below for specific information pertaining to this month's programming.

Indicates Homeland One training modules.

Indicates that the program premieres this month on LETN.

Indicates that the program is tested and a printed copy of the courseware is included in this month's shipment (ask your department's Training Officer for a copy). Courseware and testing for these programs is also available on PRIME.net. To get the most out of LETN training, use the courseware and programming in a supervisor-led classroom setting.

Indicates that the accompanying courseware is available online through PRIME.net, LETN's fully integrated e-learning solution. For more information, call (866) 725-7975 or visit www.pwpl.com/primenet.

Indicates that the program is available as a Training On Demand product.
