

### CORE

 **Calibre Presents Roll Call: Ethical Decision-Making in Law Enforcement, Part 1**

057-0206

Law enforcement is under constant scrutiny, and officers are expected to act in an ethical manner at all times. Ethical dilemmas arise throughout an officer's career; therefore, regular and intensive training must be carried out to provide the officer with a decision making framework. This program, part 1 of a two-part series, discusses ethics, integrity, and ethical decision-making frameworks. The negative effects brought about by unethical actions are discussed in the context of the officer, the department, and the officer's family. Part 2 of this series (EDA# 057-0306) discusses ethical dilemmas and takes the learner through the ethical framework to aid in the decision making process.

 **Back to Basics: Tactical Thinking—Traffic Stops: Focus on Occupants**

111-0002

Tactical thinking education and drills provide officers a safe environment in which to think critically through scenarios. Practicing tactical thinking is essential to officer safety and provides experiences for the officer to draw upon during a real-life situation. This course discusses tactical thinking and how it relates to the procedures for conducting a traffic stop. Traffic stops may be a routine procedure, but officers should never treat them as such. Join us for the latest information about safely conducting low-risk and high-risk traffic stops while using tactical thinking.

 **Calibre Presents Roll Call: Duty Weapons Safe at Home**

057-0205

Police officers are well aware of their responsibilities when it comes to protecting their duty handguns from negligent or improper use. Too often, however, many officers seem to forget or ignore these lessons once they arrive home from work and cross the threshold into the safety of their homes. This course looks at

ways to assist officers, so they may succeed not only in keeping themselves and those around them safe not only on the streets but in their homes as well.

 **Calibre Presents Roll Call: Suicide by Cop**

057-4005

This training program looks at pre-incident indicators of potential suicide-by-cop events based on hundreds of incidents by the Los Angeles County Sheriff's Department. Specific tactics to use by the law enforcement officers in response to the indicators are presented. The media reaction to law enforcement when the suicide-by-cop subject used a toy or replica weapon to precipitate the incident is discussed.

### SUPPORT

 **GIS: Providing the Foundation for Real-Time Intelligence, Part 1**

405-0706

Imagine having the floor plan of a large bank at the fingertips of law enforcement officers before responding to a robbery; or the most direct route for firefighters to a wildfire; or a graphical representation of the most likely terrorist targets within a given geographical radius. Sound like science fiction? Not anymore. GIS (Geographic Information System) technology provides first responders with real-time intelligence data in the form of maps, floor plans, photographs and much more. Join us as we "get under the hood" and explain the basics of how this new technology works. This program also profiles Wilson, N.C., a growing city that has implemented GIS technology to make quicker, more informed decisions about how to prepare and respond to disasters.

 **Investigating Identity Crimes, Part 2 of 2**

160-0205

Identity theft is the fastest growing crime in America, according to the Federal Trade Commission. In 2003 alone, more than 9.9 million Americans were victims of identity theft. Because of the broad range of crimes

facilitated by identity theft and the pervasiveness of the problem, the federal government has enacted laws that establish what constitutes identity theft, created a central clearinghouse to assist victims and law enforcement at all levels, and redefined the meaning of the term "victim." Part two of this two-part series looks at the role of the investigator and the federal resources available to assist in the investigation.

 **LETN Special: The Amber Alert System**

405-0605

The AMBER Alert system is a nationwide system that is organized under state or regional plans for the purpose of assisting in the recovery of abducted or endangered children. The system was developed to quickly get information out to the public about these children in order to aid law enforcement in the speedy recovery of the child. The role of the dispatcher is often critical in the quick deployment of personnel, and in some cases, in the actual entering of information into the system to initiate the AMBER Alert.

 **Tactical Patrol: Active Killer**

163-0014

While operating as a police officer, there may come a time when you are required to immediately respond to an ongoing critical incident at a school, workplace, or other environment. Should the incident involve a person or persons who are barricaded and/or holding innocent people as hostages, the established law enforcement guidelines should be employed. This program will examine methods of response and how you can effectively put an end to such an incident.
