

CORE

EMERGENCY PREPAREDNESS

LARGE VEHICLE BOMBS, POST-BLAST INVESTIGATION PART 2

LETN-162-0002

We return to the FBI's Large Vehicle Explosive Device Post Blast Investigators training at Fallon Naval Air Station in Nevada. Students there are learning to investigate a large vehicle explosion like the one that destroyed the Alfred Murrah Federal Building in Oklahoma City, where 168 people were killed. We examine the approach to the scene and conducting the preliminary survey, as well as potential crime scene hazards and the need for universal precautions.

HOMELAND SECURITY & COUNTERTERRORISM

INTELLIGENCE AND THE U.S. PATRIOT ACT

LETN-161-0002

This program provides law enforcement personnel insight into intelligence-gathering under the U.S. Patriot Act and how the federal guidelines affect those methods used by state and local law enforcement.

EMERGING ISSUES IN HOMELAND SECURITY

CRIMINAL PROFILING, PART 1

LETN-164-0001

This program reviews the history of the FBI's Behavioral Sciences Unit and VICAP and defines profiling and the different types of profiling.

SUPPORT

CSI AND FORENSICS

THE PROPER USE OF TRAJECTORY RODS

LETN-160-0003

Trajectory rods are useful for the determination of bullet trajectories in the reconstruction of shooting incidents. It is important to know and understand the special techniques associated with trajectory rod usage. This program describes these modern techniques and discusses their application.

DIGITAL CRIME & INFRASTRUCTURE PROTECTION

DIGITAL CRIME: SINGLE-SCENE SEIZURES

LETN-152-0002

This program outlines current procedure for searching and seizing evidence from a single location crime scene. It covers search warrants for electronic evidence, and details recognition and specific identification of potential electronic evidence. It concludes with documentation, collection, preservation, transportation, and storage of seized evidence.

TACTICAL PATROL

RESPONDING TO SNIPERS AND MASS SHOOTINGS

LETN-163-0001

This program provides responders insight into what to expect when encountering a sniper attack and attacks where there are mass casualties. Tactical methods of scene approach will be reviewed, comparing the first widely known mass casualty sniper attack, the University of Texas Tower in 1966, to the recent sniper attacks in Montgomery County, Va.

LEGAL UPDATE

U.S. V. DRAYTON — CONSENT SEARCHES

LETN-165-0002

Police board a city bus for routine drug and weapon interdiction. As they move down the aisle, they tell people riding the bus that they are looking for drugs and weapons, asking the commuters if they had any illegal items in their bags. Several passengers are asked if they can be searched. After their consent, cocaine was found and arrests were made. Do the police have to advise individuals of their right to refuse consent searches? Find out in this compelling program.

LETN CLASSICS

LETN CLASSICS

PROFESSIONAL TRAFFIC STOPS – NHTSA

The National Highway Traffic Safety Administration joins LETN to examine the steps required for an effective, safe traffic stop. Risk factors for injury to an officer during a stop are many. How can we improve our methods to safely stop, conduct the business of the stop, and re-enter the traffic flow? It all begins with the approach.
