

CORE**NEW** **Communications: The AMBER Alert System**

405-0605

A+  The AMBER Alert system is a nationwide system organized under state or regional plans for the purpose of assisting the recovery of abducted or endangered children. The role of the dispatcher is often critical in the quick deployment of personnel and, in some cases, in the actual entering of information into the system to initiate the AMBER Alert.

A+ **SIDS and Shaken Baby Syndrome: Physical Abuse**

888-0229

A+  The second part of our series on responding to child abuse incidents takes a critical look at the investigation of SIDS and Shaken Baby Syndrome. Forensic collection and interview techniques will be presented.

A+ **Roll Call: Confined Area Survival Tactics, Part 3 of 4**

176-2171

A+  Phil Messina of Modern Warrior joins us to continue our examination of his confined area safety/survival tactics program. It is designed to teach you how to “fight when there is no space.” Join us as we look at factors involving available weapons.

A+ **CSI: Bloodstain Evidence Documentation**

160-0010

A+  Due to heightened scrutiny it has become increasingly important for crime scene investigators to correctly document their work. This episode of CSI Forensics takes the investigator through actual cases outlining the steps to properly document blood evidence from collection through analysis and eventual courtroom presentation.

SUPPORT**NEW** **Calibre Presents Roll Call: First Responder Level Hostage Negotiations**

057-0605

A+  When you are faced with a barricaded subject, a suicidal subject, or a hostage-taker, you must try to bring

the situation to a quick and safe conclusion. When the subject refuses to comply and is contained, the first responder must rely on his communication skills to de-escalate the incident, maintain control and safety, and provide support when the tactical and negotiations teams arrive. This lesson provides fundamental training in handling critical incidents and establishing person-to-person communication.

NEW **Interview and Interrogation, Part 1 of 4: Effective Interview Techniques**

160-0605

A+  Interviewing people suspected of committing crimes is a critical and time-intensive activity for a police officer. An officer can ask good, relevant questions, but if he doesn't take time to listen and interpret the answers he won't be able to ask the right follow-up questions. Join us as we take an up close look at how you can develop the skills necessary to be an effective interviewer.

NEW **FIRSTaid, Part 1 of 4: Infectious Diseases**

070-0605

A+  If you were first to arrive at a medical scene would you be prepared to give first aid? Our four-part FIRSTaid series is intended to provide you with a basic understanding of medical conditions and procedures you may encounter in the field. This edition covers infectious diseases and tells you how to recognize the threat, when and how to use barrier protection, and what to do if you think you've been infected.

A+ **Digital Crime: Windows Operation Systems and Basic Evidence Recovery**

152-0004

A+  This program orients officers to basic forensic analysis of seized computers. Although specialized search tools are discussed, an emphasis is placed on basic procedures not requiring commercial software tools. Many techniques are possible with free, downloadable tools, although they are more time-consuming. This is not a complete course on computer forensic analysis; it is an orientation and introduction.

A+ **Legal Update: Florida v. J.L.**

165-0004

A+  In 2000, the U.S. Supreme Court decided the case of *Florida v. J.L.* The Court ruled an anonymous tip that a person is carrying a gun is not sufficient to justify a stop and frisk of the person. This Legal Update will discuss the *Florida v. J.L.* case.

HOMELAND SECURITY**A+** **Homeland One Preparedness Level—Site Security Procedures for WMD Incident**

947-1108

A+  This program helps the first responder understand his agency's site security procedures for WMD events. This includes incident scene security and keeping unauthorized personnel away from adjacent hazardous areas.
