LEGAL UPDATE

Kyllo v. United States

165-0007

In this case, the Supreme Court sought to answer the question, "Does the use of a thermal-imaging device aimed at a private home from a public street to detect relative amounts of heat within the home constitute a 'search' within the meaning of the Fourth Amendment?" The Court ruled that where, as in this case, the government used a device that is not in general public use to explore details of the home that would previously have been unknowable without physical intrusion, the surveillance is a "search" and is presumptively unreasonable without a warrant.
