

CORE

HOMELAND SECURITY & COUNTER TERRORISM

AWARENESS LEVEL TRAINING: COURSE I INTRODUCTION TO HOMELAND DEFENSE

947-1001

In Course I of our Awareness Level training, we introduce the first responder to the broad concept of homeland security and his or her role in this new world. Familiar concepts of WMD and Incident Command are brought together under a unified approach to terrorism preparedness (and preparedness for any large-scale, multi-agency incident).

AWARENESS LEVEL TRAINING: COURSE II PRINCIPLES AND FEATURES OF THE INCIDENT SYSTEM

947-1002

In Course II of our Awareness Level training, Homeland One weaves Incident Command concepts to effective strategies regarding terrorism response. Even those who already know the Incident Command System will be compelled to rethink their roles in terrorism preparedness.

AWARENESS LEVEL TRAINING: COURSE III IMPLEMENTATION OF THE INCIDENT COMMAND SYSTEM

947-1003

In Course III of our Awareness Level training, Homeland One continues its introductory exploration of the Incident Command System in relation to homeland security. Once you've completed this course, you're ready to delve deeper into the progressive structure of our Awareness Level training.

EMERGENCY PREPAREDNESS & WMD WHAT EVERY OFFICER SHOULD KNOW, PART 2

162-0010

This module focuses on pathogens and toxins, the two major categories of biological weapons (Texas Engineering Extension Service, 2002). The module provides an overview of the weapons/agents that fall into each category, providing an orientation to the systems of infection or attack. Information is presented on known inoculations and antidotes, the types of criminal/terrorist groups likely to use biological weapons, and the conditions necessary for a successful, large-scale attack.

EMERGING ISSUES IN HOMELAND SECURITY TERRORISM IN THE MIDDLE EAST, PART 2: RADICAL ISLAM

161-0052

This lesson provides an understanding of radical and fundamental Islam as an ideological basis for motivating terrorism both in the Middle East and abroad. Three major fundamental movements within the Sunni tradition are identified by country of origin: Wahhabism (Saudi Arabia), Muslim Brotherhood (Egypt) and Salafism/Jihadist-Salafism (Egypt and Afghanistan). In a unique manner, this module also describes similarities between fundamentalist behaviors, whether Muslim or Christian.

SUPPORT

CSI FORENSICS

BLOODSTAIN EVIDENCE IN SHOOTING SCENES

160-0008

When you are called to the scene of a shooting incident, bloodstain evidence is critical to your investigation. This module examines many different aspects of bloodstain evidence in shooting scenes, studying the impact of bullets and shot pellets on the human body. The program also describes the different possible patterns of bloodstains you might come across. Each particular pattern produced depends on the type of projectile, the projectile velocity, the location of the impact on the body, and the body position before and after impact.

GEOGRAPHIC INFORMATION SYSTEMS: GETTING STARTED

056-0001

How effectively can your department map criminal activities in your area? How about tracking known high-risk intersections so that improvements can be made? Geographic Information Systems, or GIS, allows law enforcement to do this and more. Part one of our three-part series focuses on understanding the process of getting started with a GIS and how to determine which system best fits your department's needs and its implementation.

LEGAL UPDATE

VIRGINIA v. BLACK

165-0008

In April 2003, the U.S. Supreme Court decided the case of *Virginia v. Black*. In this case, the Court sought to answer the question, "Does a state statute that bans cross burning with intent to intimidate violate the First Amendment right of freedom of expression?" The Court ruled that such a statute is constitutional within the meaning of the First Amendment. Please join us as we review this case.

MED AID

CAUSES OF VIOLENCE & KINEMATICS OF MVCS

040-0007

This special program deals with special medical issues for first responding police officers. Originally designed for emergency medical technicians, this training is important for anyone who may have to work with a trauma victim until medical personnel arrive. This module examines motorcycle trauma and accidents involving emergency vehicles.

WILDERNESS SERIES, PART 1: PATROLLING TECHNIQUES

179-0152

This series begins with an exploration of tactical movement as it relates to closing with suspects or objective sites in various types of terrain other than urban environments.

LETN CLASSICS

DEFENSIVE TACTICS FOR MASS TRANSIT VEHICLES

179-0166

Violent criminal behavior and domestic acts of terrorism may involve mass transit vehicles. There are risk reduction protocols for a passenger or someone sequestered on board. Join us as Phil Messina of Modern Warrior takes us through pre-event planning and application.

WEAPON RETENTION

176-2151

Since most retention techniques begin with the suspect's hands already on the weapon, conventional thinking often overlooks the prevention aspect of this type of training. In this episode of *Roll Call*, police trainer Tony Lambraia of the Police Warrior Training Institute highlights the various phases of weapon retention, with a special focus on prevention. Without physical intrusion, the surveillance is a "search" and is presumptively unreasonable without a warrant.
