

## CORE

### HOMELAND SECURITY & COUNTER TERRORISM

The threat of terrorism demands a new level of commitment and readiness inside the world of Law Enforcement. This means greater preparedness, more knowledge, and increased training requirements. Our new Homeland One Core Curriculum is here to put you ahead of the learning curve, meeting needs before they become mandates. In a progressive way, each course serves as the stepping stone for what's to come. Work your way from the Awareness Level up to highest level of preparedness!

#### **Awareness Level Training, Course VII Recognizing Hazardous Material Incidents**

947-1007

Understanding what determines a hazardous material incident, as well as the risks associated with these materials in an emergency event, aids the first responder in maintaining their own safety as well as public safety. This program explains identification of hazardous materials with the use of the NAERG, and potential outcomes of an emergency response when hazardous materials are present.

### EMERGENCY PREPAREDNESS & WMD

#### **WMD: What Every Officer Should Know, Part 3: Nuclear and Radiological Weapons**

162-0012

One generally thinks of ballistic missiles and other expensive weaponry when considering nuclear and radiological weapons. This episode is designed to acquaint officers with both small-scale devices based on nuclear explosions (e.g., suitcase nukes) and non-traditional weapons designed to spread radiological materials over wide areas to inflict mass casualty (so-called "dirty bombs"). Officers will become familiar with the potentially devastating effects of both types of devices, including effects on property and human life.

## SUPPORT

### CSI FORENSICS

#### **Bloodstain Evidence Documentation**

160-0010

Due to heightened scrutiny it has become increasingly important for crime scene investigators to correctly document their work. This is essential when dealing with bloodstain evidence. This episode of CSI Forensics takes the investigator through actual cases outlining the steps to properly document blood evidence from collection through analysis and eventual courtroom presentation.

#### **Geographic Information Systems, Part 3: GIS and Crime Analysis**

056-0003

This show focuses on understanding how geographic information systems (GIS) tools and applications can benefit police departments in the analysis of crime and other essential data that could not be conducted using tabular data alone.

#### **Legal Update: Atwater v. City Of Lago Vista**

165-0001

A Texas woman was arrested for not wearing a safety belt, and neither were her children. Lago Vista police arrested her for a Class C misdemeanor. Did they exceed their authority? Find out how the U.S. Supreme Court ruled and how this may affect future Class C arrests.

## LETN CLASSICS

### Stop and Frisk Considerations

176-2157

It is not disputed that law enforcement officers are permitted to protect themselves and others from threats to their safety. What is often disputed is an officer's assessment of a threat and the level of force selected to counter it. How do you determine when a frisk is necessary and how do you immobilize the subject to perform the pat down safely?

### Geophysics and Forensic Anthropology

184-0126

When Lori Keidel-Romaneck was 5 years old, she secretly witnessed her father burying her mother, Dianne, in a backyard grave, but was too frightened to tell the police until 29 years later. In this program, a police detective, a geophysicist from Necro Search International, and a forensic anthropologist use ground-penetrating radar to locate the fossilized skeleton — hidden beneath a huge slab of concrete — and a photographic overlay of Dianne's face and skull to identify the remains to within a 99.9 percent certainty.

### Crime Prevention

185-0133

Join us as we go undercover with the Saginaw Township Police Department's crime Prevention Unit in Michigan to see how they have reduced crime in their area. They also share suggestions that may help you better serve your community. This program was produced by WNEM Channel 5 News.

#### KEY TO SYMBOLS

Use the key below for specific information pertaining to this month's programming.

Indicates Homeland One training modules.

Indicates that the program premieres this month on LETN.

Indicates that the program is tested and a printed copy of the courseware is included in this month's shipment (ask your department's Training Officer for a copy). Courseware and testing for these programs is also available on PRIME.net. To get the most out of LETN training, use the courseware and programming in a supervisor-led classroom setting.

Indicates that the accompanying courseware is available online through PRIME.net, LETN's fully integrated e-learning solution. For more information, call (866) 725-7975 or visit [www.pwpl.com/primenet](http://www.pwpl.com/primenet).

Indicates that the program is available as a Training On Demand product.

**For more information visit [www.LETN.com](http://www.LETN.com)**
